Lyon, 7 october 2024

**CrossManager V2024.4 extends today's CAD Software compatibility!**

This new version highlights Datakit's expertise of over 30 years' experience in the conversion of 2D, 3D B-Rep, PMI / FD&T, metadata and mesh representations.
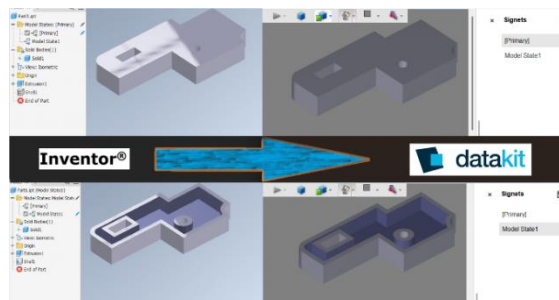

With its new 2024.4 version, Datakit strengthens again its leadership in 2D, PMI / FD&T data retrieval.

Get more reading capabilities:

- ✓ **2D dimensions data of Catia V5 models or assemblies,** as well as the support of **extension lines breaks** or **moveable datum targets,** or the handling **of different ranges of tables, …**

Extension lines break

- ✓ **Inventor parts with model state (configuration)**
  I.e: For design offices the export of the file in a PDF format will be an efficient solution to evaluate different alternatives of a component, while using CrossManager.

Export Inventor parts with model state to Pdf with CrossManager

- ✓ **Images from CreoParametric (2D) drawings and PMIs (as well as their attributes) from CreoView files.**

Numerous enhancements have also been implemented to make it even easier to **read metadata** and **attributes** (materials, masses, user data, etc.) from CATIA V5, 3DEXPERIENCE, Solid Edge, SOLIDWORKS, NX, STEP, etc., and to **reduce file exchange times**.

Version 2024.4 guarantees the reading (import) of the very latest software updates:

- ✓ **Fusion 2.0.19994**
- ✓ **JT V10.10**
- ✓ **NX series 2406 (till 2406.3000)**
- ✓ **Parasolid: till V37.0**

And to export files to the following ones:

- ✓ **CATIA V5-6R2013 till V5-6R2017**
- ✓ **UG NX 2212**
